# Guess the number of m&m's in the jar

This competition refers to the large, corked, hexagonal jar with the colourful selection of candy inside.

Entrants name: _____

There are two ways to enter this competition.
**Pick the competition you think is most strategic. If you enter both, your entry will be disqualified.**

**1)** Guess the total number of m&m's in the jar. Closest to the actual number of m&m's wins.

Your guess:

**2)** Guess how many of each colour m&m there are in the jar. If one (or more) of your six guesses is within ±4 from the correct number, you win.
